

Parenting **TOPIC**

Is Biting an issue with your child?

FACT 1: Communication

A child bites because they can't talk and say "leave me alone" Adults talk to express themselves. Biting is a child's way of expressing themselves if they haven't develop the ability to talk.

FACT 2: Love Bite

Another reason is your child is learning. They see people kissing and they try to kiss too. Only problem they go a bit overboard and bite... LOL. (next time you get cranky at your child for biting chances are they are trying to be affectionate.

FACT 3: Health

A common health issue for biting is an ear infection. A child will bite when they have an ear infection because this releases pressure. (Have you had your child's ears checked?)

FACT 4: Teething

Teething is another reason for biting (Have you got your teething toy?)
